

Flout Translate

Info Pack

What It Is

Flout Translate is a plugin that makes any website instantly multilingual.

- Works with any platform (Shopify, WordPress, Webflow, custom sites).
- Creates SEO-friendly translated pages (search engines can index them).
- Translates static and dynamic content in real time.
- Setup takes just a single snippet of code and a few minutes.

Key Benefits

- Reach international visitors without rebuilding your site.
- Reach local visitors who read in a different primary language.
- Higher SEO rankings in every supported language.
- Simple setup, no developer needed.
- Fast, cached translations for better performance.
- Plans for every budget.

维生素贴片：忙碌妈妈的秘密武器

忙碌的妈妈生活总是令人抓狂。工作、家庭和个人责任的周旋常常会让你感到不堪重负。我们的维生素贴片能方便有效地帮助你保持健康。

无需增加您繁忙的日程，即可为您的身体提供所需的营养。探索我们专为忙碌妈妈设计的维生素贴片，带来便捷和益处。

All Paid Plans Include

✓ Smart Translation

We use multiple translation models and select the best one for each language pair and context, instead of relying on just one.

✓ AI Translation

Enhance translations by adding context descriptions (medical terms, brand names, tone, legal definitions) for the best result in every language.

✓ Visitor Smart Start

Automatically starts your site in the visitor's browser language, and remembers their choice for the next visit.

✓ Theme Integration

Customize the language selector to match your site's fonts, colors, and style — including icon and placement.

✓ SEO-Friendly Indexing

Translated pages are fully indexed and ranked by search engines, with no extra webserver configuration needed.

✓ Online Editing

Easily edit and fine-tune translations directly on your live site.

✓ Analytics

Track basic statistics on your translation volumes at a glance.

✓ Translation Events

Developers can hook into events when a language changes, enabling advanced workflows.

✓ API Access

Programmatically control the Flout Translate Engine from your own code, with full flexibility to complement or override automation.
